

VALUE PREFERRED MEDICATIONS

Updated April 2026

Introduction

ScriptSave's Value Preferred Medications List may offer additional prescription savings for you on brand name and generic medications. Always consult with your healthcare provider on all your prescriptions. For additional information about ScriptSave® please visit www.scriptsave.com or call **1-800-700-3957**.

Helpful Hints

Generics drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in capital letters followed by the generic name.

ScriptSave's Value Preferred Medications List is organized into broad categories (e.g. Anti-Infective drugs). Within most categories, drugs are sub-grouped by drug class (e.g. Penicillins).

To search for a drug name within this PDF document, use the Control and F keys on your keyboard, or go to Edit in the drop-down menu and select Find/Search. Type in the word or phrase you are looking for and click on Search.

Not all information listed in the PDF document may apply to your specific program such as tier designations, specialty, prior authorizations, step therapy, etc. This tool should be used as a reference only.
